### AVCS updates for Vietnam and Papua New Guinea

➤ **Improved ENC coverage for Vietnam soon available**

Please be advised that additional ENC coverage for Vietnam will be available in AVCS shortly under the producer code VN. Vietnam Navy ENCs (VN) are supported by PAYS.

In this regard, the existing Vietnam ENCs has been updated from the current producer code VN to V1 and V2.

We have received feedback that some ECDIS'es showing a warning that V2 ENCs are failing to load or are displayed as non-official. This is most likely due to the ECDIS not recognizing the V2 producer code. Affected vessels should contact their ECDIS equipment manufacturer to request for a new ECDIS software update.

➤ **Change producer codes of approximately 160 ENCs from AU to PG**

Australia (AU) is changing the producer codes of approximately 160 ENCs from AU to PG (Papua New Guinea). The rebadging will be made gradually throughout the next 12-18 months.

Best regards,

Monica Skadberg
