

TECHNICAL BULLETIN

Bulletin No: 003/19

Distribution: Internal/External

Date: 28 Oct. 2019

Taiwan ENC's now available in AVCS

Please be advised that Taiwan ENC's (1U) are included in AVCS as of week 42/2019.

For ships navigating in the coastal waters or entering ports of Taiwan, only these charts produced by Taiwan ENC Center may be used with ECDIS to meet the SOLAS chart carriage requirements.

Taiwan ENC's are supported by PAYS.

Other important notes:

- Because the "1U" producer code is not listed as official by the International Hydrographic Office, the Taiwan ENC's may show up in ECDIS displayed as "non-ENC" or "unofficial". For compliance purposes the local authorities have stated that the indication can be ignored in the case of Taiwan ENC's.

- Some of the Taiwanese ENC's overlaps with GB ENC's of the same navigational purpose/usage band.
