ECDIS error when displaying Faeroe Islands D2 ENC's

From January 2023 the previous coverage provided with Denmark DK ENC's is now provided by Faeroe Islands with the new producer code D2. The D2 producer code was added to the IHO Standard S-62 during 2021.

It is possible that some vessels may not have updated the version of S-62 loaded on ECDIS and therefore the ENC's may display with the symbol to show them as 'Unofficial'.

Vessels experiencing this issue should contact their ECDIS equipment manufacturer to request for a new ECDIS software update.

Best regards,

Monica Skadberg
