

St NavStation 4.2

The ultimate maritime route planning tool that puts all critical voyage information at the fingertips of navigators.

Now with enhanced Passage Planning module and weather services

Smarter Passage Planning

- Plan routes on the latest updated ENC's, with the required ADMIRALTY Digital Publications, ADMIRALTY e-Nautical Publications, NavArea Warnings and Navtex stations automatically added to each waypoint/leg in the route.
- Add and edit waypoints in Passage Plan view. All changes of waypoints are updated simultaneously in the Passage Plan.
- Exchange routes between other vessels in your fleet.

Enhanced Weather Services

- Data from Weathernews International, the world's largest private weather service company.
- New parameters: In addition to wind, wave, currents, swell and air pressure, NavStation provides information on tropical cyclones and weather fronts.
- Improved presentation and easier ordering of weather data
