

# Admiralty Vector Chart Service Pay As You Sail

**AVCS**

AVCS is the world's leading ENC service for ECDIS offering the widest coverage in the marketplace

# NAVTOR AVCS Pay AS You Sail Service

AVCS is the world's leading ENC service for ECDIS, offering the widest coverage in the marketplace. With over 12,500 Electronic Navigational Charts (ENCs), AVCS allows mariners to navigate an unparalleled number of international shipping routes

## Pay As You Sail creates an easy, and cost effective, solution for the complicated task of managing Electronic Navigation Charts (ENCs)

The PAYS system works on a subscription basis and the NAVTOR AVCS PAYS Service makes all AVCS immediately available, free of charge for planning purposes. As soon as the voyage starts, only the AVCS charts actually used for navigation are automatically calculated and charged every three months. The system facilitates seamless chart management on the bridge and it not only eases the navigator's workload, but also increases safety and security at sea.

## NavStick simplifies distribution of AVCS and Admiralty Digital Products

The NAVTOR PAYS with AVCS solution will be distributed to users on a pre-loaded NavStick USB device, which when inserted into a ship's ECDIS will instantly install the required AVCS coverage. The Admiralty Digital Products; Digital Radio Signals Volume 2 and 6, Digital List of Lights, TotalTide and e-Nautical Publications are also include on the NavStick. New versions

and updates to the ADP and e-NP and the latest AVCS charts and updates can then be regularly retrieved using NAVTOR's online programme NavSync, ensuring that all vessels are kept up to date to comply with Port State control and vetting.

## NavSync offers a better and more cost-effective way to receive updates

The NAVTOR NavSync offers the navigator a far better and far more cost-effectively way to receive and update the ENC portfolio and Digital Publications onboard. Updates can easily be downloaded to the NavSync via internet on a computer onboard. After having downloaded the latest version of the ENC updates, the NavSync program offers a print function to produce a report for Port State or vetting

*The NAVTOR NavSync software has made CD distribution of ENC a time of the past*

control verifying that the vessel is equipped with the latest ENCs and required publications.

## NavTracker gets it all organized

Subscribers to the NAVTOR AVCS PAYS Service can enjoy the benefits of using the complimentary NavTracker PC software to manage a vessel's AVCS portfolio. With NavTracker, both the navigator on board and the ship management on shore have a full overview of chart usage, chart update history, vessel tracking and service management, in addition to a free of charge three-days weather prediction.
